

Flagger Train-the-Trainer Course

This one-day course is designed for those involved in the day-to-day operations where workers and the general public are exposed to hazards created by vehicles and/or equipment. Safety precautions must be in place for the protection of those who come into contact with the construction zone.

Course Objective:

- To provide information on standardized Flagger procedures in the construction industry
- To inform the participants about the legislated responsibilities of the employer and the flagger
- To provide information and assistance in complying with the applicable legislation

Course Content:

- How to train workers who have no prior knowledge or experience in flagging
- The flagger's responsibilities for the protection of themselves, co-workers, and the general public
- Identifying the correct flagging practices and procedures, equipment, and clothing
- How to communicate with co-workers and the general public
- The importance of the flag station and the flagger's location
- How to deal with emergency vehicles and others
- Developing a training program using the "Tell, Show, and Do" method

Participants who successfully meet the course requirements (successfully completing an "unassisted" exam attaining 80% or better result) will be issued an NSA Flagger Train-the-Trainer certificate.

Re-certification is required every three years and can be achieved by taking the one-day course again, or by successfully challenging the online exam.

This course is a pre-requisite for the Temporary Traffic Accommodation Course.

This course can be one of the four core courses required for the standard Certificate of Recognition (COR)[™] Program.
