

Prime Contractor Program

This one-day course has been designed for people in the construction industry who want to know about the NWT legislation requirements as it relates to “Prime Contractor” on a multiple employer work site.

Course Objectives:

- To inform participants of the legislated responsibilities of a “Prime Contractor”
- To assist in the “how to” plan, implement, and effectively manage a health and safety system or process when in the role of the “Prime Contractor”
- To provide a framework to manage a project when designated the “Prime Contractor”
- Understand the duties of the “Prime Contractor’s site designate”

Course Content:

- Legislation introduction and background
- Federal Legislation – Corporate Liability
- Provincial Legislation
- Prime Contractor Requirements and Obligations

Establishing System or Process to Manage Health and Safety on the Work Site:

- Consideration of system requirements
- Developing work site safety plan
- Prime Contractor Guide (Includes sample forms)
